

Ping Mudong

+8 (915) 237-6288 | Moscow, Russia | antonping1999@gmail.com | github.com/antonping

BASIC INFORMATION

- Russian-born Chinese, with parents working in Moscow, Russia.
- Interested in programming language theory, functional programming and formal verification.
- Currently exploring constraint logic programming and symbolic AI in my personal project.

EDUCATION

Moscow State University, Faculty of Computational Mathematics and Cybernetics Moscow, Russia
Master's in Applied Mathematics and Informatics *Expected Sept. 2026*

Moscow State University, Faculty of Computational Mathematics and Cybernetics Moscow, Russia
Bachelor's in Fundamental Informatics and Information Technology *Sept. 2021 — June 2026*

- Student at the Department of System Programming. Cumulative GPA: 4.71/5.0.
- Academic supervisor: Alexey V. Khoroshilov (Хорошилов Алексей Владимирович)
- Bachelor's Thesis: "Prune: functional-logic programming language for constraints-based test data generation"

WORK EXPERIENCE

Assistant Engineer, AI Infrastructure (part-time) June 2024 — Feb. 2026
Huawei Russian Research Institute, Math Modeling Lab (2012 Lab) *Moscow, Russia*

- Developed high-performance AI operators and optimized execution for Huawei Ascend310P NPU architecture.
- The work of our team was adopted by Huawei HQ and used in wireless business AI models.
- Assisted the team with communication issues in international cooperation projects as a multilingual colleague.

Compiler Engineering Intern (summer internship) June 2023 — Aug. 2023
International Digital Economy Academy, MoonBit Compiler Team *Shenzhen, China*

- Rewrote the parser to enhance error reporting and resilient parsing for MoonBit programming language.
- Handled various tasks related to the code formatter and middle-end type checking in MoonBit compiler.

PROJECTS

Prune (<https://github.com/AntonPing/prune-lang>) Feb. 2025 — Present

- A constraint logic programming language designed as a scalable solver for recursive logic queries.
- Implemented with branching heuristic for faster searching, details are described in my Bachelor's Thesis.
- Plan to keep developing and explore more possibilities and applications of logic programming.

Norem (<https://github.com/AntonPing/norem-lang>) 2023 — 2024

- A functional programming language implementation as a hobby project, no longer maintained.
- Implemented in Rust. Language supports generic functions, ADT, pattern matching, type inference, etc.

EXTRACURRICULAR ACTIVITIES

Lomonosov Universiade 2026 (Универсиада «Ломоносов») Apr. 2026

- An academic competition in applied mathematics hosted by Moscow State University.
- Scored 75 points, securing direct admission to the Master's program with no entrance exams.

TechArena Challenge MSU 2023 Apr. 2023

- The competition involved a scheduling algorithm problem in 5G technology, sponsored by Huawei.
- Our team, named "<Team_Name_Here>", achieved 5th place in MSU track.

SKILLS

- **Language skills:** Chinese (Native), Russian (Fluent), English (Fluent)
- **Programming Languages:** Python, Rust, C/C++, C#, Haskell, OCaml, Racket, Idris, MoonBit
- **Tech&Tools:** Linux (Ubuntu, Arch), Git, Docker, PyTorch, TensorFlow, LaTeX, Typst, SMT Solver
